1 Secure the mounting plate to the junction box.

2 **For Standard Junction Box Only:** Place the fixture bracket onto the mounting studs and secure in place using the hex nuts.

3 Connect the fixture ground wire to a suitable ground in accordance to local electrical codes.

4 Connect the white fixture wire to the neutral power line wire with a wire nut.

5 Connect the black fixture wire to the hot power line wire with a wire nut.

6 Properly place all wires and wire nut connections into the junction box/fixture base, mount the fixture onto the mounting plate/fixture bracket, and secure it in place using the fixture screws.

7 Install the shade bracket onto the socket and secure it in place by screwing the shade collar nut onto the socket.

8 Install the shade by aligning the holes on the shade with the holes on the bracket, then secure in place using the shade screws.

9 Screw the lamps into the sockets. Refer to the label on the socket for Max Wattage Information.

10 Screw the long threaded pipe to the bottom of the fixture.

11 Place the pipe cover over the pipe and secure it in place by screwing the cap tightly onto the bottom of the fixture.
