

INSTALLATION INSTRUCTIONS

Model # P1620, P1621

READ AND SAVE THESE INSTRUCTIONS

WARNING! SHUT POWER OFF AT FUSE OR CIRCUIT BREAKER.

AVERTISSEMENT! COUPER LE COURANT AU NIVEAU DES FUSIBLES OU DU DISJONCTEUR.

PREPARING FOR INSTALLATION (Fig. 1)

1. Shut off the power at the fuse box or circuit breaker box and remove the old fixture, including the mounting hardware.
2. Carefully unpack your new fixture and lay out all the parts in a clear area. Take care not to misplace any small parts necessary for installation.
3. Remove screws (L) and rubber rings (K) to separate metal shade (M) from back plate (G).
4. Remove ball nuts (J) and rubber washers (H) to separate back plate (G) from crossbar (A).
5. Attach crossbar (A) to outlet box (C) (not included) using outlet box screws (B). The side of crossbar (A) marked "GND" must face out.

CONNECTING THE WIRES (Fig. 2)

6. Connect the electrical wires as shown in Fig.2. Make sure that all wire connectors are secured. If your outlet box (C) has a ground wire (green or bare copper), connect the fixture's ground wire to it. Otherwise, connect the fixture's ground wire directly to the crossbar (A) using the green screw (E) provided.

COMPLETING THE INSTALLATION (Fig. 1)

7. Align back plate (G) onto screws (D) and secure with ball nuts (J) and rubber washers (H). (Fig.1)
8. Place metal shade (M) over back plate (G) and secure with screw (L) and rubber rings (K).
9. To prevent moisture from entering outlet box (C) and causing a short, use clear silicone sealant (i.e. Indoor/Outdoor Silicone Sealant) to outline the outside of metal shade (M) where it meets the wall leaving a space at bottom to allow moisture a means to escape. (Fig.3)

Your installation is now complete. Return power to the outlet box and test the fixture.

Replacing LED module (Fig.4)

The LED module can be replaced by a qualified electrician without cutting of wire and without damage to any decorative element to which the fixture is attached. See installation steps for more details (Fig 4.)

- a. Shut off the power.
- b. Remove fixture from the wall by loosening screws (L) and rubber rings (K) and ball nuts (J) and rubber washers (H), then disconnect the wires. (Fig. 1)
- c. Remove screws (S) and LED shade (R) from support frame (N).
- d. Remove screws (Q) and LED module (P) from support frame (N), then carefully pull the wire out of the hole.
- e. Reverse steps b-d for installing the new LED module.

Note: Illustration (Fig. 1) on this manual is for installation purposes only. It may or may not be identical to the fixture purchased.

Dimmable with ELV and/or LED compatible wall dimmer switches.

"CAUTION-RISK OF FIRE CONSULT A QUALIFIED ELECTRICIAN TO ENSURE CORRECT BRANCH CIRCUIT CONDUCTOR"
ATTENTION – RISQUE D'INCENDIE, CONSULTER UN ÉLECTRICIEN QUALIFIÉ POUR VOUS ASSURER QUE LES CONDUCTEURS DE LA DÉRIVATION SONT ADÉQUATS.
