---

1   Determine the wanted height or look of the fixture with the provided stems, swivel, and/or chain and assemble them by screwing them together. All the parts may be used alone or used in combination. NOTE: Use hang straight for standard ceilings and use link and loop for sloped ceilings.

2   Feed the fixture wires through the stems/hang straight or link and loop assembly and screw the assembly to the socket assembly.

3   Unscrew the collar nut off the screw collar and place it onto the stem/hang straight or link and loop assembly followed by the canopy.

4   Screw the screw collar onto the threaded nipple.

5   Feed the fixture wires through the threaded nipple and screw the mounting plate assembly onto the hang straight or link and loop.

6   Align and secure the mounting plate to the junction box.

7   Connect the fixture to a suitable ground in accordance to local electrical codes.

8   Connect the white fixture wire (square and/or rigid) to the neutral power line wire with a wire nut.

9   Connect the black fixture wire (round and/or smooth) to the hot power line wire with a wire nut.

10   Neatly place all the wires into the junction box, place the canopy onto the ceiling and secure it in place with the collar nut.

11   Install the shade onto the socket and secure it in place with the shade ring.

12   Screw the lamp into the socket. Refer to the label on the socket for Max Wattage Information.
