PRODUCT DESCRIPTION

Hy-Brite LED Tape is the perfect solution when you need more light than Standard LED Tape but less than high output LED Tape. Producing 200 lumens, the Hy-Brite uses the same connectors and accessories as the High Output LED Tape. The low profile tape is the ideal for coves, architectural details, under and in cabinets, toe kicks, and back lighting.

FEATURES

- · Available in 16' roll, 12" section, and 4" section
- · 24V DC system
- · 200 lumens per foot
- · Single color illumination in three color temperatures (2700K, 3000K or 4200K)
- · Separable every 12", easily disconnected and connected without soldering
- · Field cuttable every 4" or 4 LEDs
- Easy to install; pre-applied 3M™ tape or 15 acrylic mounting clips (included with roll)
- · No soldering or additional wiring is required

INCLUDED WITH EVERY 16' ROLL

(1) 16' Tape Light Roll with 12" separable sections, (15) Acrylic Mounting Clips with screws [NATHR-680], and (1) 12" Power Line Interconnector [NAH0-609].

SPECIFICATION

Construction: The silicone encapsulated tape can be cut every 4" or 4 LEDs at marked intervals. Cutting does not effect circuit (shrink wrap tube included for concealment). LED Tape Light is also separable every 12", each connection has pre-installed shrink wrap around power connections to ensure listing. Simply slice the clear shrink wrap at each electrical connection, and separate pieces. This eliminates soldering when using partial rolls. Each roll or kit comes with 12" power line connector [NAHO-609].

Mounting: Each Tape Light includes pre-applied 3M™ adhesive tape for simple installation. Optional channels and clear acrylic clips are available.

LIMITATIONS

- · Not rated or warranted for enclosed applications
- · Tape light and most accessories are not rated for in-wall installation (NATL-W16-2 is rated for in-wall installations)
- · Do not install in where LED chips are exposed to direct sunlight, as damage to the phosphor will occur
